Experience.

Terakeet / Frontend Software Engineer **Syracuse, NY (Remote) / March 2022 - Present**

- Build and update frontend features using Vue.js, HTML, and SCSS.
- Work with backend developers to create necessary API endpoints and output.
- Create and update unit tests for frontend components and features using Jest.
- Actively work with UX designers to ideate and design good user experience.
- Work with other developers to maintain consistent and readable code.

KPS3 / Web Developer **Reno, NV / September 2019 – March 2022**

- Built custom SQL query for filtering posts within WordPress.
- Developed and managed websites by leveraging JavaScript, PHP, SCSS, Vue.js and Express.js.
- Designed and implemented a code release process for Shopify sites.
- Used Github actions to create a CI/CD process for WordPress.
- Contributed to the development and testing of a custom WordPress theme.

Noble Studios / UI/UX Designer **Reno, NV / February 2019 – September 2019**

- Met tight deadlines within a fast-paced environment through effective management of time between several clients.
- Decreased the bounce rates from 99% to around 95% by designing a product tour based on modern trends.
- Audited existing interfaces to identify new design opportunities.
- Wireframed and designed sites in short time spans to meet deadlines.
- Worked with developers to QA frontend and design on sites.
