PROFESSIONAL SUMMARY

Frontend developer focused on fast, consistent, and scalable web experiences. I build production UI across marketing + product surfaces, partner closely with design, and ship performance and workflow improvements across modern stacks.

EXPERIENCE

Frontend Developer
April 2024 – Present

Samsara

- Led frontend delivery for high-traffic experiences across Samsara.com (AI site search + chat, Video Hub, interactive visualizations).
- Shipped end-to-end features with a focus on performance, accessibility, and responsive UI quality across devices.
- Improved delivery workflows by building an AI-assisted design-to-code pipeline (component generation + ticket linkage).
- Strengthened engineering execution via clearer technical docs, PR hygiene, and cross-team alignment on implementation plans.
- Reduced page cost and improved performance by optimizing bundles/render paths and coordinating fixes with platform teams.
- Tech: Vue 3, Nuxt, Tailwind, SCSS, Contentful, Algolia, AWS, REST/GraphQL, MCP servers, Figma, Cursor

Contract Frontend Software Engineer
December 2024 – December 2025

Automox

- Built and shipped frontend features in a production web application using React and TypeScript.
- Implemented UI updates from product and design specs with attention to usability, accessibility, and consistency.
- Added and maintained automated tests to improve reliability and prevent regressions across key user flows.
- Contributed across the stack, including updates in a Laravel/PHP codebase when needed.
- Tech: React, TypeScript, CSS, Cypress, Vitest, Laravel/PHP

Frontend Developer
March 2022 – April 2024

Terakeet

- Built and maintained internal tools including a pricing tool, customer success wiki, admin dashboard, and data visualizations.
- Integrated APIs and search systems to support scalable, data-driven frontend experiences.
- Improved application reliability through unit and component testing and proactive bug prevention.
- Scaled reusable UI patterns by collaborating closely with UX and maintaining shared component libraries.
- Documented frontend standards and common issues to improve onboarding and development velocity.
- Tech: Vue 2/3, TypeScript/JavaScript, Axios, Contentful, Algolia, Vitest, Jest, Sigma

Web Developer
September 2019 – March 2022

KPS3

- Developed client websites across Vue/React/JS with modern HTML/CSS and performance best practices.
- Built Shopify Plus experiences with Liquid + custom themes and established a repeatable release process.
- Delivered WordPress features including custom Elementor components and theme enhancements in PHP.
- Improved site performance and accessibility through code splitting, async loading, and AA compliance work.
- Built a PDF generation service using Express + Puppeteer for automated document output.
- Tech: JavaScript, Vue, React, Liquid, Shopify Plus, WordPress, PHP, Express, Puppeteer, GitHub Actions

EDUCATION

B.S. Information Systems
2015 – 2019

University of Nevada, Reno
